

**Brian Guralnick, J.D.**

Brian's mother passed away from a misdiagnosed melanoma in 1997 at the early age of 69 after a three-year battle with this debilitating disease. Initially surfacing on the bottom of her foot as a callus that would not heal; it was misdiagnosed as a bacterial problem or a fungus. During three subsequent exams, she was told not to be concerned. Brian's mother did not see another physician until a year later when her wound became so large and painful that she could no longer walk on her foot comfortably. She was never advised to get a biopsy nor advised to see a dermatologist. This horrible tragedy is why Brian is so passionate about the RDK Melanoma Foundation and dedicated to furthering the mission of education about this deadly disease.

Brian's passion for helping people with medical injuries extends to his business practice, wherein he founded the Injury Law Offices of Brian D. Guralnick, P.A. in 1998. Since that time, Brian has successfully led a team of lawyers, case managers, and legal assistants in their efforts to help fully evaluate the injuries and damages sustained by victims of negligence, such as those received by individuals in catastrophic car and trucking accidents.

Brian is a semi native of Florida since he moved to the state to begin college at the University of Florida, in Gainesville, in 1985. Thereafter, Brian received his law degree from Stetson University College of Law in St. Petersburg, Florida, in 1992. Upon his graduation, he has been living and practicing law in West Palm Beach, Florida. Brian has been actively involved and taken leadership positions in the legal community, as well as other local civic and charitable organizations.
